Summary

Dynamic Data Analyst with 5 years of experience in statistical analysis, data modeling, and AWS. 3x AWS certified.

Technical Skills

Programming languages: Python, SQL

Frameworks: Pytorch, Scikit-learn, Tensorflow, transformers, NLTK, NumPy, Pandas, Flask

Visualization: Tableau, matplotlib, seaborn

Cloud: AWS, Sagemaker, Bedrock, Pinecone

Tools: Jupyter, Service Now, Jira, Github, Airflow, MS SQL Server, LLM, Powershell

Projects

COVID-19 revenue forecasting model | Accenture, Hilton Hotels

- An ensemble model that predicted guest reservations and revenue for Hilton during the COVID disruption in the United States region. Integrated with Tableau enabling top 50 hotels to get weekly forecast reports.
- Tools and techniques: predictive modeling, exploratory data analysis, Tableau, Python, MS SQL Server, sklearn
- Results: The model accurately predicted guest reservations and average spending per person with mean absolute percentage error of 19%.

Guest churn prediction model | Accenture, Hilton Hotels

- Modeled 2 years of historical data from Hilton Loyalty Program, Hilton Honors, to create a classifier that identifies churn-prone members.
- Tools and techniques: predictive classification, machine learning, Python, MS SQL Server, AWS Sagemaker, MLOps
- Results: The model successfully predicted churn with 85% accuracy and enabled targeted marketing campaigns increasing loyalty by 10%.

Experience

Data Analyst

Jul 2024 – Present

Brightmind Enrichment

- Understand business and technology needs to streamline data collection processes (Tableau, SQL, Python)
- Perform data manipulation, data cleansing, and exploratory/statistical analysis for business decisions by using SQL, R and SAS
- Uses a data driven approach to assess campaign success, develops and tracks KPI metrics, and optimizes future campaign tactics.

Application Development Analyst (Data Analyst)

Jan 2021 – Jul 2022

Accenture

- **Data Engineering (Airflow, Glue, AWS):** Engineered cloud-native ETL pipelines to analyze transactional and guest behavior data.
- **COVID-19 revenue forecasting model (Tech used: Python, SQL Server, PyTorch, XGBoost, Docker, AWS Sagemaker):** Created ensemble machine learning model that forecasted guest reservations and revenue for top 50 Hilton properties during the COVID disruption with mean absolute percentage error of 19%. Created interactive tableau dashboards with forecasts.
- **Guest churn prediction model (Tech used: Python, Sklearn, SQL Server, AWS Sagemaker):** Modeled 2 years of historical data from Hilton Loyalty Program, Hilton Honors, to create a classifier that identifies churn-prone members with 85% accuracy enabling targeted marketing campaigns increasing loyalty by 10%.
- **Enhancing patch deployment application (Tech used: Lambda, Cloudwatch, SNS):** Evolved the patch deployment application by implementing new features to check for pre-requisites, remediate known failures, create detailed reports on installation, and notify concerned teams via emails thereby reducing deployment failures by 90%.

Application Development Associate (Database administrator)

Jan 2019 – Dec 2020

Accenture

- **Automation and six-sigma:** Led and implemented 7 Six Sigma Lean and Yellow Belt projects, automating 15 business processes saving 10k man-hours worth of effort annually and \$30k for the client in third-party service fees. Recognized as **TechStar** by Accenture.
- **Patch deployment automation (Tech stack: Python, Service Now, Powershell):** Engineered and deployed an automated patch deployment application for Hilton's OnQ PMS across 6,000+ Windows servers worldwide to reduce manual effort by 80%, down-times by 90%.
- **Incident and change management (Service Now, Jira):** Resolved 150+ unique critical issues by understanding enterprise application architecture in-depth, conducted knowledge transfer sessions with a team of 30, and presented root cause analysis to client executives.
- **Database administration (MS SQL Server):** Managed 6000 production database instances worldwide ensuring consistency, reliability, and durability of the data. Created new SQL stored procedures and jobs to ensure compliance with existing rules and regulations globally.

Education

Master of Science in Computer Science (GPA: 3.96): Stevens Institute of Technology, Hoboken, NJ

Sep 2022 – May 2024

- **Courses:** Machine Learning, Deep Learning, Data Mining with R, Big Data, Agile development, Algorithms, Statistics
- **Tech:** Sklearn, PySpark, MongoDB, Java, Python, Tensorflow, Keras

Bachelor of Technology in Electrical and Electronics Engineering: VIT University

Jun 2013 – Jun 2017

Certifications

AWS Certified Machine Learning Engineer Associate ([Link](#))

AWS Certified Solutions Architect Associate ([Link](#))

AWS Certified AI Practitioner ([Link](#))
